Director, Operational Support
and Capability,
Fire and Emergency
Management Division

AIM AND GOAL

AIM - To identify and build best practice approaches to animal emergency management to enable engagement with animal owners, and other stakeholders in disasters and emergencies.

GOAL - The goal is to improve outcomes for public safety and the resilience of responders, animal owners, those with animal-related businesses, and communities.

YEAR ONE - SCOPING

- 🐾 **Critical audit:** formal policies, procedures and local initiatives, current research
- 🐾 **SA bushfires interviews:** livestock producers' experiences
- 🐾 **Responder survey:** responder experiences and needs
- 🐾 **Stakeholder survey:** organisational challenges and needs, priority groups
- 🐾 **Knowledge exchange workshop:** one-day meeting (Sydney, August)

SA BUSHFIRE INTERVIEWS

CQUni team members – CFS/BNHCRC community taskforce

Determine the levels preparedness, expectations and experiences of livestock producers during bushfires

- 🐾 41 livestock producers – 3 field sites
- 🐾 Threatened by significant bushfires in January 2014

SA BUSHFIRE INTERVIEWS

Few livestock producers had formal bushfire plans

General low concern for bushfire threat

High self efficacy

Stay and defend

No plan B

Insurance (usually under-insured or not at all)

Conduct risky behaviour moving sheep and defending property at the last minute

Don't utilise materials/information or warnings, or attend community programs or meetings

Don't utilise emergency management information- rely heavily on local networks

Smith, Taylor, Thompson AJEM (April 2015)

RESPONDER SURVEY

Aims

To assess attitudes towards operational responsibility for animals.

To scope the range and extent of challenges faced by emergency services personnel in their interactions with animals and their owners

Goal

To gather the views and experiences of a broad cross-section of emergency services personnel operating across Australia and all hazards

- 🐾 Data collected May – July 2014
- 🐾 165 respondents

RESPONDER SURVEY

Themes	%
Examples of dangerous/risky behaviour or inappropriate actions	26.4
Refusal to leave or be parted from animals	22.6
Comments about horses and horse owners as a special case	17.0
Details of emotional responses of owners	13.2
Experiences with dangerous animals/animal behaviour	13.2
Issues around owners returning/wanting to return early or being denied access	11.3
Owners' focus solely on animals and ignoring risk to self and others	9.4
Owners having unrealistic expectations of the level of help from emergency services	7.5
Problems with response co-ordination - with groups/agencies or absent owners	5.7

'very emotional situations in time of large fires endangers staff and public'

'Roads used for evacuating communities blocked by horse floats... People helping to evacuate friends' horses with no plan or idea of the area and not knowing the roads into or out of the area they have gone into to assist.'

RESPONDER SURVEY

- 🐾 Need for education/clarification and clearer communication about the role and responsibilities of emergency services organisations
- 🐾 Cultural shift required to meet changing public attitudes and expectations
- 🐾 Initial quantification of the issue
- 🐾 Identification of specific issues
 - Logistics
 - Unclear policy/operational responsibility
 - Interactions with owners during response

Taylor et al., BNHCRC Research Forum (December 2014)
Smith et al., PLoS Currents Disasters (January 2015)

STAKEHOLDER SURVEY

Comprehensive national survey of Australian Response Organisations and other relevant stakeholders involved in the management of animals and their owners in emergencies and disasters

AIM - to identify and prioritise the challenges encountered by these organisations in the management of animals and animal owners

Data collected July – August 2014

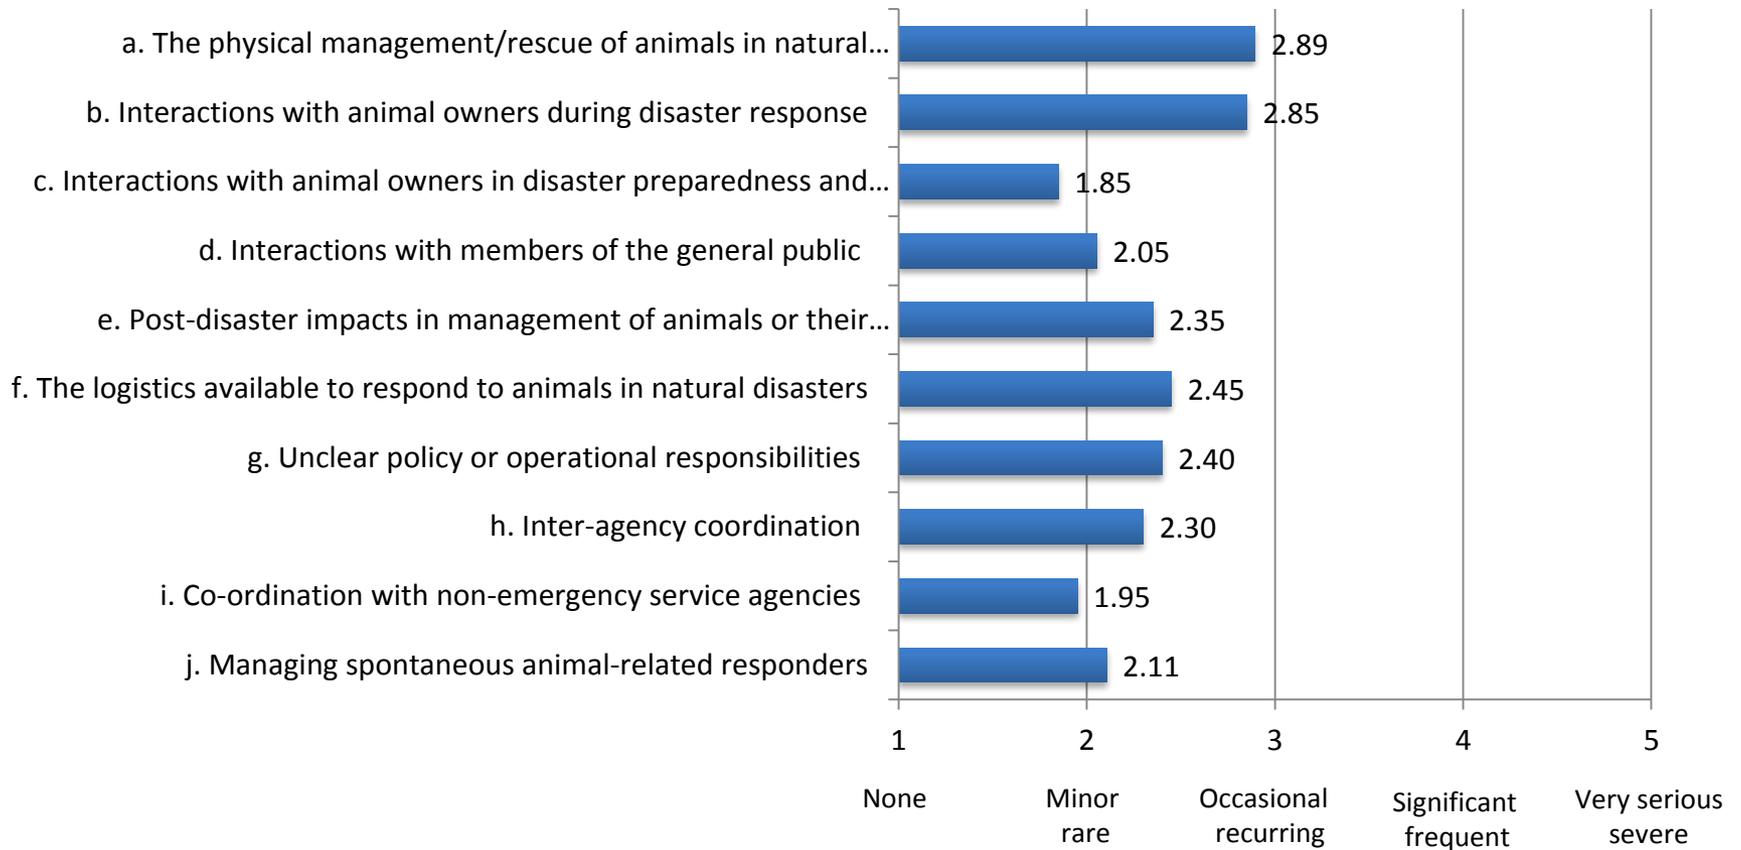

- 🐾 98 respondents
- 🐾 68 organisations
- 🐾 Range of organisations (categorised)

Taylor et al., AJEM (April 2015)

SPECIFIC PROBLEMS AND CHALLENGES

Emergency Services

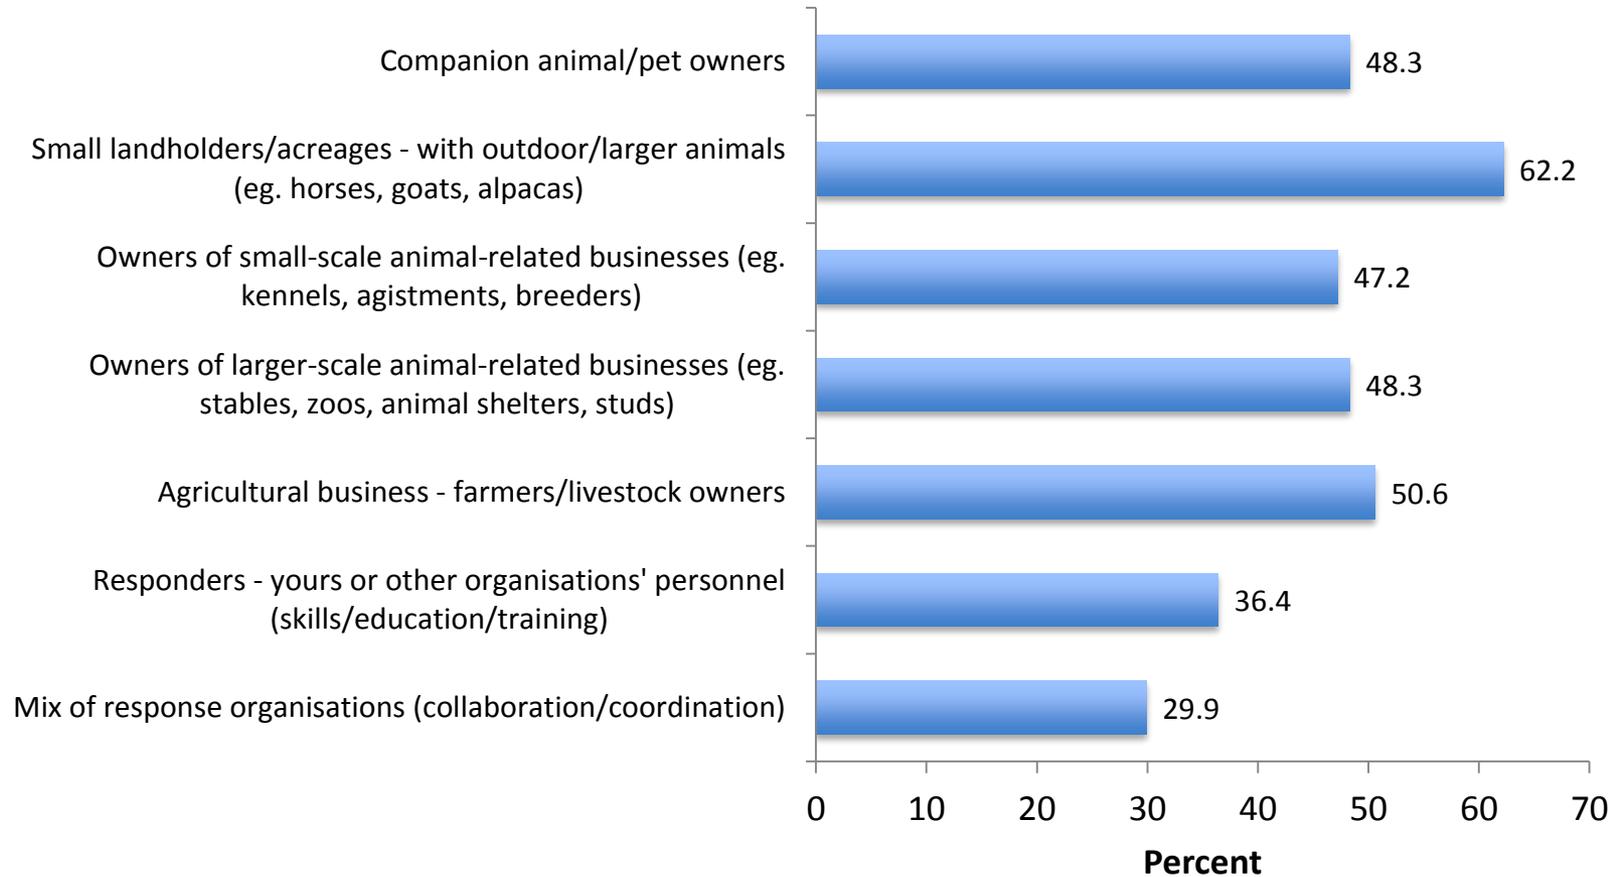

MAIN ISSUES BY ORGANISATION CATEGORY

	1	2	3
Emergency Services	a. The physical management/rescue of animals in natural disasters (2.89)	b. Interactions with animal owners during disaster response (2.85)	f. The logistics available to respond to animals in natural disasters (2.45)
Primary Industries	a. The physical management/rescue of animals in natural disasters (2.95)	f. The logistics available to respond to animals in natural disasters (2.89)	d. Interactions with members of the general public (2.80)
Local Government	f. The logistics available to respond to animals in natural disasters (3.23)	b. Interactions with animal owners during disaster response (2.69)	a. The physical management/rescue of animals in natural disasters (2.62)
Animal organisations	j. Managing spontaneous animal-related responders (2.87)	f. The logistics available to respond to animals in natural disasters (2.67)	e. Post-disaster impacts in management of animals or their owners (2.60)
RSPCA	f. The logistics available to respond to animals in natural disasters (4.25)	g. Unclear policy or operational responsibilities (4.00)	a. The physical management/rescue of animals in natural disasters (4.00)
Other Govt Agencies	j. Managing spontaneous animal-related responders (3.14)	d. Interactions with members of the general public (2.86)	a. The physical management/rescue of animals in natural disasters (2.71)
Human welfare	e. Post-disaster impacts in management of animals or their owners (3.33)	b. Interactions with animal owners during disaster response (3.00)	f. The logistics available to respond to animals in natural disasters (2.33)

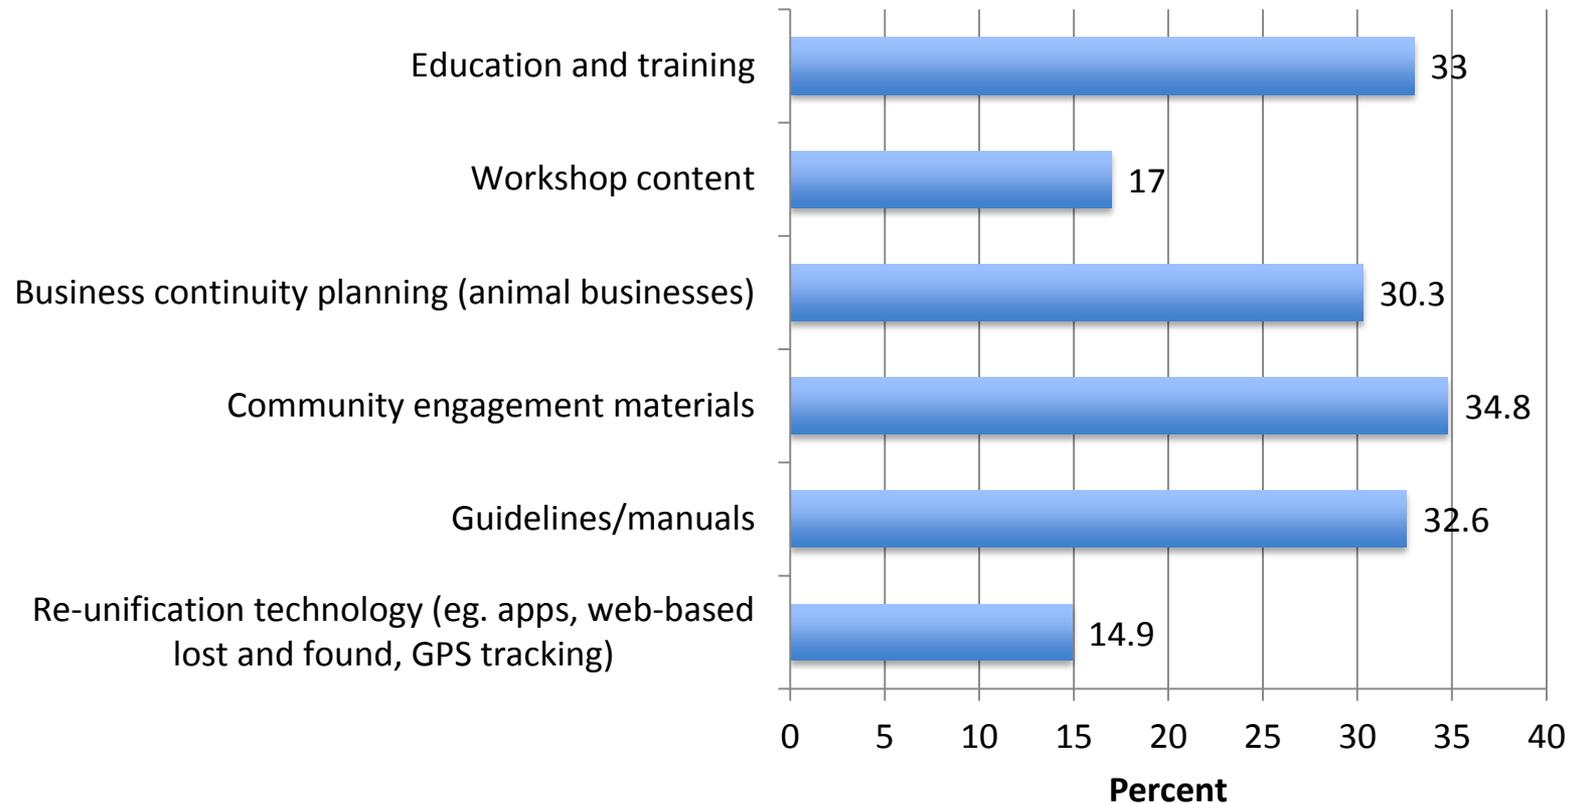

PRIORITY AREAS – OWNER GROUPS/FOCUS AREA

All stakeholders - 'High priority'

TYPES OF OUTPUT MOST USEFUL

All stakeholders - 'Extremely useful'

KNOWLEDGE EXCHANGE WORKSHOP

Aim

To assist in planning the field study stage of the project by

- 🐾 bringing together researchers, end-users, and stakeholders
- 🐾 discussing and sharing information/knowledge
- 🐾 24 stakeholder organisations represented
- 🐾 police and emergency services, primary industries, university sector, and animal advocacy and welfare

Taylor, Eustace, McCarthy, BNHCRC (December 2014)

MANAGING ANIMALS IN DISASTERS (MAID)
Improving preparedness, response and resilience through individual and organisational collaboration

Tuesday 19 August 2014
Venue: Rydges Sydney Central, 28 Albion Street, Surry Hills

Time	Activity	Facilitator
0845	REGISTRATION - NETWORKING OPPORTUNITY	
0915	Introductions	Greg Eustace (Facilitator)
0920	Welcome from the Bushfire and Natural Hazards Cooperative Research Centre	(TBC)
0930	MAID Project Overview	Mel Taylor
0950	People - Animals - Business	Greg Eustace
1000	Setting the scene (interactive scenario)	Harold Wolpert
1030	MORNING TEA (30 mins)	
1030	A tangled web: review of policies, plans, and responsibilities	Greg Eustace
1100	Plenary Discussion - Is there a common operating picture? 🔴 Legislation, policies, procedures - how it needs to work in states and jurisdictions 🔴 Consent and recent initiatives - learning from the best and avoiding duplication	
1135	Plenary feedback:	
1140	Responder experiences and stakeholder priorities: MAID scoping surveys	Mel Taylor
1150	Plenary Discussion - What do stakeholders want? 🔴 Stakeholder organisations' priorities and needs - what's in the mix and in scope? 🔴 Lessons observed from the past - moving forward, future challenges	
1215	Plenary feedback:	
1230	LUNCH (30 mins)	
1315	Preparedness, expectations, and experiences: Livestock producers and companion animal owners - study feedback	Brad Smith / Mel Taylor
1335	Plenary Discussion - What do animal owners and communities need? 🔴 Considering animal ownership/animal enterprise owners and communities - identifying priority needs 🔴 Effective community engagement strategies - ways to support and work with animal owners	
1355	Plenary Feedback:	
1430	Priority areas, gaps, target groups and MAID project outputs: Stakeholder feedback	Mel Taylor
1435	Plenary Discussion - How can MAID succeed? 🔴 Priority areas, gaps, target groups - what (or who) is amenable to change? 🔴 Tools, training, support materials - identifying the best project outputs to develop	
1435	Plenary Feedback:	
1430	AFTERNOON TEA (15 mins)	
1455	Establishing the priorities - reviewing the feedback - creating a shortlist	Mel Taylor
1530	Closing Remarks	(TBC)
1645	CLOSE	

YEAR TWO – FIELD WORK

- 🐾 Emergent informal volunteer groups
- 🐾 Peri urban animal owners
- 🐾 Agricultural flood study

EMERGENT INFORMAL VOLUNTEER GROUPS

AIM - to explore the integration of informal volunteers into animal emergency management. Sampson Flat bushfire will be used as a case study to explore questions regarding the challenges for, and strengths and limitations of, informal volunteering in this context.

Series of semi-structured interviews

- 🐾 Coordinators/administrators of emergent informal volunteer groups
- 🐾 Members of established animal organisations (extending)
- 🐾 Members of the volunteer group South Australian Veterinary Emergency Management (SAVEM),
- 🐾 Trained emergency services personnel and personnel from key government agencies

'PERI URBAN' ANIMAL OWNERS

What are the needs, issues of and challenges for peri-urban animal owners/enterprise owners in emergency management?

What are the challenges posed for emergency responders?

How can we improve the interface between peri-urban animal owners/enterprise owners and emergency responders to improve emergency management?

- 🐾 Bushfire risk (Tas) and Flood risk (NSW) contexts
- 🐾 Mixture of animals requiring different preparations
- 🐾 May 'host' animals not belonging to them (agistment/boarding)
- 🐾 Stronger, more individuated human-animal bonds with large animals like alpacas and horses, and non-household pets like chickens

AGRICULTURAL FLOOD STUDY

Queensland-based
Cattle farmers

PHD STUDENT RESEARCH

Rachel Westcott

Investigating the application of protection motivation theory to the behaviour of animal owners and emergency responders in bushfire natural hazards

- 🐾 Sequential mixed methods study
- 🐾 Port Lincoln, SA
- 🐾 Primary responders
- 🐾 Secondary responders
- 🐾 Animal owners
