# INTRODUCTION

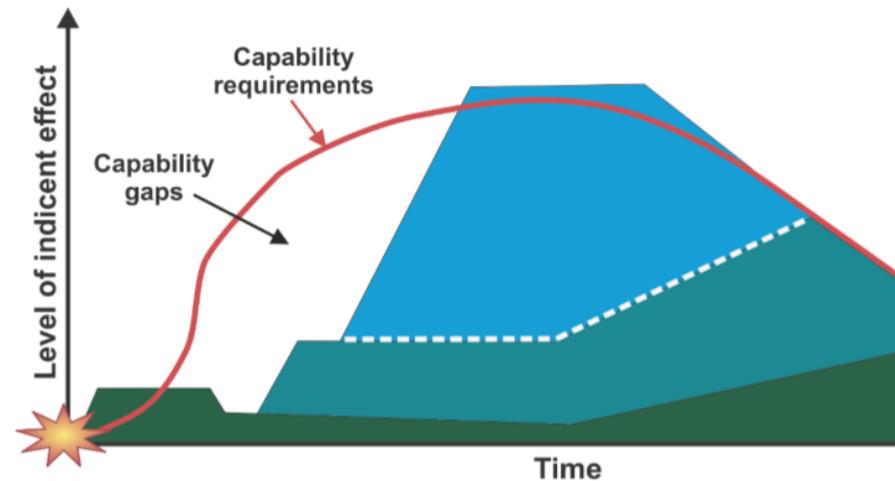

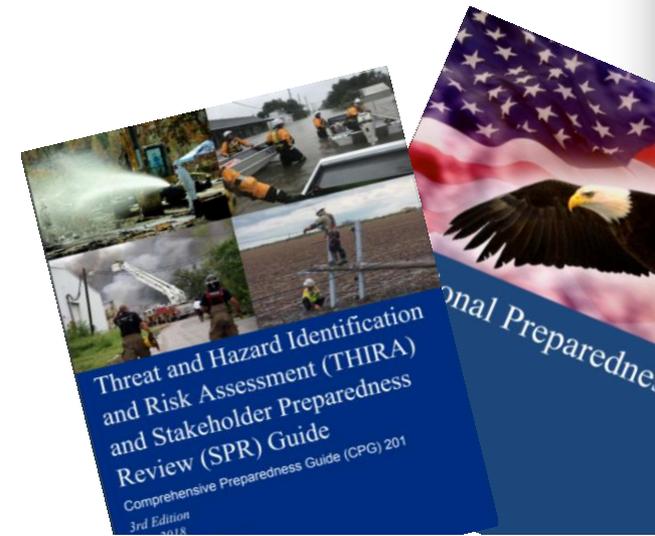

Darwin 1974

# CAPABILITY MATURITY ASSESSMENT

- A process to be utilised to measure the current state of capability to identify priority areas for further effort
- Based on defined core capabilities and capability elements from national framework
- Scenario based

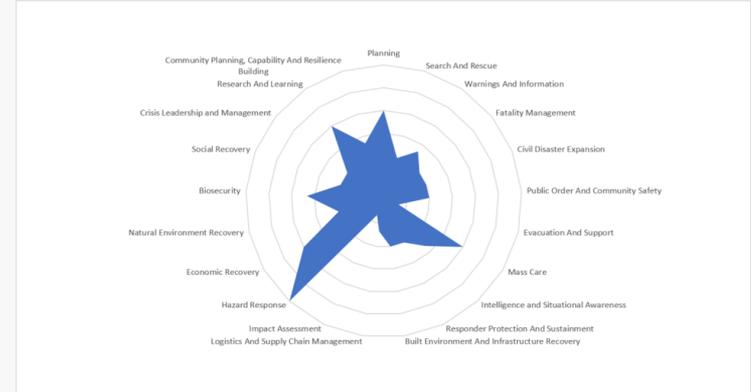

# RESULTS DASHBOARDS

- Reporting features designed for senior management consumption
- Can be further customised
- Results guide priorities to identify additional sources of capability

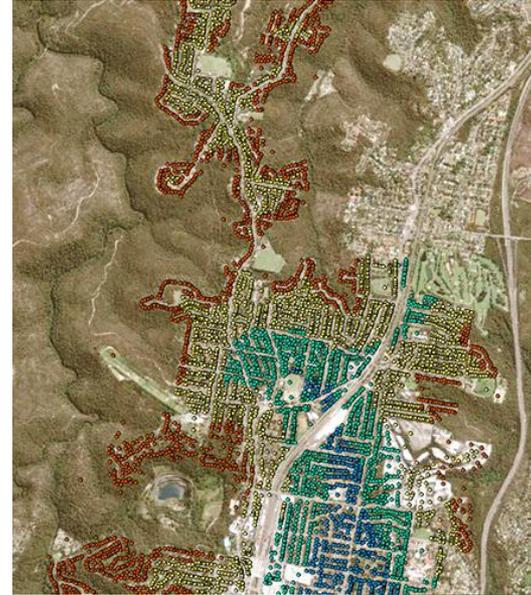

## People

#	Core Capabilities	Capability Element Average
1	Planning	3
2	Search And Rescue	2
3	Warnings And Information	2.33333333
4	Fatality Management	2
5	Civil Disaster Expansion	2
6	Public Order And Community Safety	2
7	Evacuation And Support	1.33333333
8	Mass Care	3
9	Intelligence and Situational Awareness	2.33333333
10	Responder Protection And Sustainment	2
11	Built Environment And Infrastructure Recovery	2
12	Logistics And Supply Chain Management	1.66666667
13	Impact Assessment	1.33333333
14	Hazard Response	4
15	Economic Recovery	3
16	Natural Environment Recovery	2
17	Biosecurity	2.66666667
18	Social Recovery	2
19	Crisis Leadership and Management	2
20	Research And Learning	3
21	Community Planning, Capability And Resilience Building	2.33333333

# POSSIBLE IMPLEMENTATION APPROACH

- Develop severe to catastrophic scenarios
- Determine capability leaders
- Capability leaders to coordinate assessment utilising to the tool
- Central coordinator collates results
- All agency workshops to validate results
- Reporting, planning and decision making

# SUMMARY

- Easy to use
- Aligns with National Preparedness Framework
- Complementary to more detailed analytical approaches
- Will generate planning discussion
- Will inform decision making, action planning and prioritisation
- Can be embedded into continual preparedness reporting processes
